No. 8

LUNA COUNTY, NEW MEXICO

A Serial Story of Its History, People, Stock, Mining and Commercial Industries, Railway Facilities and Educational Advantages.

PART 1. Introduction.

The increased interest which is being exhibited by eastern people in the outh west and the numerous inquiries that are constantly being recieved throughout our territory as to the inducements offered to settlers by this region we are fully convinced that it will be of great benefit to our community to have a

thorough and accurate description of our county written up and illustrated at this time so that it can be distributed through the east where these inquiries

originate.

It is our intention to have these articles written by people who are thoroughly posted on the various subjects and have them give the exact concondition as they see them without exaggeration so that should any one be led by them to come here and investigate they would find conditions as represented and not be disappointed.

It is with this object in view, and for the sole purpose of bringing the advantages of Luna county before the people who are looking for a location

that we have undertaken this work. History of County by Edw. Pennington

In the early fa l of 1881, eager eyes were anxiously turned toward southern New Mexico watching the progress of railroad building and guessing where would be the junction of the two great trans-continental railways which were building toward the Golden Gate of the Pacific. In October of that year someone got a private "tip," and shared the scoop with a few of the select. The Southern Pacific builders reached a point just east of the Mimbres river three miles west of the present site of Deming, made a short halt for some and in a day or two, or three at most, the roaring western town of "New Chicago" was a reality, with realty soaring skyward, though no title worth mentioning was shown in the abstract. Title is a consideration that troubles boom town builders but little, a d it did not these. Title was an after consideration to be tackled by the lawyers and the future. The boomers ran their had Colt and Winchester documents to hold the stakes in place. A city of "Lodging," "Beds," "Dance Hall" "Club Room," "Saloon," principally "it is good to be here."

cago. A delegation of the leading citi-zens went a little west to investigate, Martin and about 500 others.

reluctantly agreed to. The judge list health was very poor at that time his tened to the arguments of his visitors and took a strictly legal view of the matter. While admitting the necessity of doing something to avert the calamity of incuring the displeasure of the railroads, the proposed proceeding was an extraordinary remedy not warranted by common law or thestatute and unfair in chancery, as the chances were all against the accused. The Judge did not say just this, but did : d-vise that only legal measures be followed and believed that in time the courts would settle the matter to the satisfaction of our people and the railroads. So the matter was drapped. The committee disbanded and never reconvened.
